## Education

A-level 2008 - Latymer Upper School  
MEng (Hons) Computing 2012 - Imperial College London

## Professional experience

- Software engineer – KCOM** Mar 2017 – current  
I carried out Java development and devops for a range of KCOM projects. I also contributed to the Java Practice and engineering culture.
- Software engineer and data scientist – Ksubaka** Jun 2016 – Feb 2017  
I worked on JavaScript, maintaining the playSpot operator's application and the realtime MoJo map. I also built Splunk dashboards to monitor fleet KPIs in Australia, China and Singapore.
- Software developer** Oct 2015 – May 2016  
I developed **ListenerApp**, an Android app for sound analysis based on my university research, and **chica**, a computer drummer with a graphical interface, which I presented to Jukedeck.
- Software engineer – MetaBroadcast** Dec 2014 – Sep 2015  
I carried out Java development and devops for Voila, a programme recommendation service, and a service for recommending educational video clips for the classroom.
- Solutions consultant – OpenMarket** Nov 2012 – Nov 2014  
I worked with client contacts to specify, build and maintain Java projects for a number of B2B projects. I also helped build an internal distributed backup system.
- Software development intern – Amadeus** Apr 2011 – Sep 2011  
I developed a prototype for the Baggage Reconciliation System, a mobile Windows Forms app in C#, integrated with the back-end with C++.

## Other qualifications

Technical reviewer for Cassandra books for Packt Publishing, performed Microsoft MOOC courses for KCOM  
Azure accreditation, trained in DDD and modern cryptographic techniques, UK driving license, Grade 5 ABRSM  
piano and music theory

6 March 2019
